

## Cambodia reflection on the New Draft Chair's Text as of 13<sup>th</sup> August 2025

Thank you, Chair and your team for the hard work to compromise the Draft Text. However, Cambodia would like to express our concern that the proposed text does not reflect the necessary positions to effectively address plastic pollution. As one of the nearly 90 supporters of the Switzerland-Mexico text on plastic products, we urge you to draft a new text which contains, among other things, a binding requirement to phase out the most harmful products and chemicals. We appreciate you ensuring that this proposal – which has received far more support than any other proposal on the same article ( Article 4, also known as Article 3 in the prior Chair's text ) – is reflected in your new text.

We thank you Chair.
