Africa Group Statement on effectiveness evaluation

Africa Group affirms that the Governing body should evaluate the effectiveness of the instrument periodically, and for its first cycle to be 4 years, and then for the following cycle to be determined by the governing body. We agree that the effective evaluation could follow the blueprint of the Montreal protocol.

We support the streamline text of Para 1, 2, 3 and 4.

And under Paragraph 2 we support OP1 and OP2 Alt and believe that the Terms of References for the Committee and the modalities for effectiveness evaluation would be determined by the governing body no later to its 2nd session.
