Text proposal

Article 7 Emissions and Releases

Australia would like to highlight the importance of gathering information on emissions and releases of plastics to ensure the efficacy of this Article and we propose a new paragraph to outline the information that should be collected and reported, as follows.

3bis Each Party shall include in its reports submitted pursuant to [Article 15] information on the volume and types of emissions and releases of plastics and chemicals of concern as used in plastics to the atmosphere, soil, water and the marine environment, and other relevant information showing that the requirements of this Article have been met.
