GCC countries Interventions on Subgroup 1.3

Article 10.b: Transboundary movement of [non-hazardous] plastic waste

Thank you, Mr. Co-chair for your hard work and granting us the opportunity to deliver our position on behalf of the GCC countries.

- Article 10 with current title of: Trade [in listed chemicals [, polymers] and products, and in plastic waste][related measures]
- In point, "b." titled: Transboundary movement of [non-hazardous] plastic waste; we propose the removal of "non-hazardous" from the title, and we support renaming it as: "Transboundary movement of plastic waste."
- It is important to note that under the Basel Convention, transboundary movement encompasses both hazardous and non-hazardous waste.
- Kuwait and the GCC countries support sub-Option 3, considering the presence of numerous provisions within the Basel Convention that address the transboundary movement of plastic waste.
