 Finance:

Para 1. Türkiye supports OP1 Alt since mobilization of national resources is a matter of national sovereignty and developing countries are already doing as much as they can.

Para 4

Türkiye supports a comprehensive and transparent financial mechanism under the instrument which is necessary for the effective implementation of the instrument by developing countries. Therefore, we believe that the mechanism should be designed for all developing countries, and they can be categorized afterwards.

We believe that the financial mechanism should be designed to mobilize resources from all sources, public and private.

However, we have concerns regarding the global plastic pollution fee as outlined in the text. Transfer of such a fee to the financial mechanism once it is collected could pose significant challenges for countries.
