

On Scope:

If we are to have a scope article, PH can support only para 1 of the suggested text, adding “full” life cycle, which is consistent with UNEA 5/14.

The second paragraph is being discussed in the other contact group. We can support Brazil and South Korea’s suggestion to defer discussion.

Other exclusions that we can support include “essential use” but, again, this is better discussed in the other contact group on the other articles.
