PREAMBLE

Chile recognizes that the text as it is, contains many elements from resolution 5/14. We see this as a good way forward.

Chile also acknowledges the importance to strengthen the reference and commitment to human rights, reaffirming the human right to a clean, healthy, and sustainable environment as an overarching concept.

We recognize the value in strengthening global coordination, cooperation and governance.

Chile fully supports the inclusion of a reference to just transition of the workforces, as well as the significant contribution made by waste-pickers and other workers in informal and cooperative settings.
