

Comment on article 2

According to Resolution 5/14 adopted by the United Nations Environment Assembly, the legally binding international instrument addresses **plastic pollution** and is based on a comprehensive approach covering the entire **life cycle of plastics**.

Two definitions are essential to facilitate the development of the various articles of the draft treaty, namely:

- **the life cycle of plastics,**
- **plastic pollution.**

The definitions are to **be established according to the main** issues posed by plastics, particularly concerning the marine environment.
