

Conference Room Paper on behalf of Peru and Rwanda

Proposal on Intersessional Work

The Committee decides to:

- 1.** Request the Secretariat to invite and compile into a report scientific and technical input from Member States and stakeholders on baseline and sustainable levels of production and consumption of primary plastic polymers, including information on imports and exports, if available.
- 2.** Request the Chair to convene an open-ended working group, in person or in hybrid format, to consider technical aspects related to all options for primary plastic polymers.
