Egypt’s Submission on Part 2.10 of The Revised Zero draft
on A- Trade in listed chemicals, polymers, and products

Egypt supports Sub - option 1 in Alignment with the African Group with minor proposals and additions.

That Egypt propose further discussion is needed on the issue of Trade in listed chemicals, polymers, and products during the intersessional work due to the lack of definitions and finalized annexes, among other things.

Additionally, Egypt emphasizes that the instrument rules should not contradict the provision of the different agreement of the world trade organization (WTO) and any measures by the Parties for its implementation should be in full conformity with that agreement

In addition to that, trade policy measures for environmental purposes should not constitute a means of arbitrary or unjustifiable discrimination or a disguised restriction on international trade and should be the least restrictive to trade and the most effective to achieve the legitimate objective of addressing plastic pollution
