India would like to propose the additions, as follows, in the Preamble.

Recognising the need for addressing plastic pollution.

Reaffirming the principle of national sovereignty in addressing plastic pollution.

Reaffirming that the states have the sovereign right to sustainable development.

In the pursuit of the objective of the instrument and being guided by the principle of equity and the principle of common but differentiated responsibilities.

Recognising the need for the assessment of requirement of resources for the financial and technical assistance including technology transfer on mutually agreed terms in regard to the obligations laid out under the instrument.

Thank you.
