Thank you.

India would like to thank Norway for the introduction of 4bis. India would like to make the submission that the proposal, to establish dedicated program of work in respect of specific sectors, must not be incorporated as one of the provisions of the proposed instrument. It proposes to look at the identified sectors to recommend for targets. The instrument’s objective is to address plastic pollution. Any such measure to address plastic pollution may be looked at by the technical body established under the instrument.

India proposes no text option for 4bis.

Thank you.
