Thank you Mr. Co-Chair,

We fully support the chair to move forward in a constructive way since the time is very limited. However, there are still some concerns regarding elements or ideas that have not been perfectly captured in the draft.

Not for us to start a line by line negotiation, but we believe that during the streamlining process, it is also very important for us to allow adding important elements, to capture the whole essence, since we believe that there are still some of our national priorities that are not perfectly reflected in the draft.

Thank you Mr. chair.
