7. Extended producer responsibility

Thank you Mr. Chair,

Indonesia supports the option 1 of the streamlined text, with the addition to also put the element from option 2 point 2 regarding “the efficient and effective traceability and accountability mechanisms” to further strengthen the draft provision in option 1, under the implementation section.

We believe that traceability and accountability mechanism is important to ensure an effective implementation of EPR.

I thank you.

8. Emissions and releases of plastic throughout its life cycle

Thank you Mr. Chair,

Indonesia would like to lend our voice to supports the option 2 of the streamlined text, since the implementation of this provision will depend mainly on the circumstances and capabilities of respective countries.

In point 5, we would also like to propose a broader scope of scientific and technical innovation to not only limited to marine environment but also in the environment as a whole. In this regard we would like to propose a deletion of the word “marine” in point 5.

Thank you.
