The Preamble should be concise and succinct, based on the UNEA resolution 5/14.

**PP7 (Rio Principles)**
While supporting the principles in the Rio Declaration on Environment and Development, we suggest to simply refer to the Rio principles in general, without going into details or specific paragraphs.

**CBDR (Common but differentiated responsibilities)**
Japan believes that plastic pollution is occurring throughout the global value chain, and plastic leakage into the environment not only from developed countries but also from developing countries, in part due to insufficient environmentally sound waste management. Plastic pollution is an issue that all countries should address, and therefore Japan considers it is not appropriate to have specific reference to CBDR (Principle 7) in the text.

**PP23 (Means of Implementation)**
PP23 goes beyond the scope of the UNEA resolution 5/14. And any discussions on means of implementation should be conducted in CG2. Therefore, this paragraph should be deleted.

We will reserve our position on other parts of draft preamble paragraphs.
