

**In the implementation of this Convention;**

- 1- Parties shall cooperate to promote and facilitate a transition towards sustainable production consumption of plastic, considering all three pillars of sustainable development (social, economic and environmental), in a balanced and integrated manner, in both its international and national dimensions.**
- 2- Underscores the need for a holistic and integrated approach that respects diverse national circumstances and capacities, where each country has an inalienable Right to Development and to pursue its own development pathways towards shared objectives.**
- 3- Emphasizing that the operationalization of Just Transitions underscores the importance of finance, technology development and transfer, and capacity building support from developed country Parties to developing country Parties to achieve just and equitable transitions, nationally and globally.**
- 4- Affirms that international cooperation on the development and deployment enhanced waste management technologies should be pursued on equal partnership that leads to shared prosperity, taking into account the needs and priorities of developing countries in pursuing their sustainable development.**
- 5- Further affirm that technological deployment is essential for the transition and must be transferred on preferential, non-commercial terms from developed country Parties to developing country Parties, without restrictive intellectual property conditions. This will ensure that all developing countries can access the tools necessary to achieve low plastic pollution levels and sustainable development.**
