

Mongolia's intervention on Article 8: Waste management

We would like to express our strong support for the interventions made by other delegates.

Para 1:

- Retention of "shall" in the first line, as it reinforces the commitment and clarity of the text.
- Retention of the phrase "national circumstances and capabilities" instead of "based on national legislation," as it provides a more inclusive and flexible approach, reflecting the diverse contexts of member states.

Para 2:

- Replacement of "encourage" by "shall" in the first line
- Addition of "nationally driven" in the line "c"
- Replacement of "all different stages" in the line "a"
