MALAYSIA’S WRITTEN SUBMISSION FOR INC-4

Contact Group 1 (Subgroup 1.3)

Part II.7: Extended Producer Responsibility

On Extended Producer Responsibility or EPR. Malaysia believes that this para is important to this instrument as it could accelerate plastic circularity and promote safe and environmentally-sound management of plastic products throughout its lifecycle. Therefore, Malaysia supports the call to establish EPR, but it is important that this process is nationally determined, to set target, context and national measures. For Malaysia, the establishment of EPR is aligned with our target in the Malaysia Plastic Sustainability Roadmap. In this regard, Malaysia can work on Option 1.

Thank you.
