Subject: Part II - 9 Waste Management

Sri Lanka is in favor of option 1. to continue the discussion on streamlining the text.

Additionally, we acknowledge the proposal submitted by the EU aimed at streamlining this section. As developing countries, we encounter challenges in managing legacy waste and implementation of proper waste management from collection to the disposal due to the lack of adequate infrastructure. Therefore, we would like to see the consideration of these concerns in the text of waste management.

Moreover, as developing countries, we face another challenge of receiving post-consumer plastic waste, which necessitates the implementation of control measures to address this issue.
