Part III.1 – Financing [mechanism [and resources]]

Comment:

Kazakhstan requests clarification on funding mechanisms for countries such as Kazakhstan and contributions from them, this information will affect Kazakhstan's final position on this provision.

In general, Kazakhstan do not support the creation of new Funds and additional fees that are related to mandatory contributions.

Would like to note that Kazakhstan is a landlocked developing country and that the consumption of plastic itself in Kazakhstan is several times less than in other countries, we also are actively developing a circular economy.

Also in the part I.4 on Principles mentioning about the principle of differentiated responsibilities

We think these aspects of countries such Kazakhstan and mentioned principle should also be taken into account in the process of discussing the financing mechanism.
