I think we need a direct statement that should clearly reflect the need for a financial mechanism. It could be something like this—

The parties shall establish a mechanism for the purpose of providing financial and technical assistance, including the transfer of technologies, to developing countries to enable them to comply with the agreed control measures.

We also want to add alternative text which reads—

The mechanism shall consist of a newly established dedicated fund to enable and support compliance by the developing countries with the agreed control measures. The contributions from the dedicated fund to the developing countries shall be additional and distinct received by such countries.

We don't support the levy of global plastic pollution fee in para 4. Hence it should be deleted.
