Part III.1 – National [Action][Implementation]Plans

Taking into account that each country has its own priorities and opportunities, in this regard Kazakhstan supports the development of national plans. At the same time, we believe it is necessary to discuss the structure of these national plans and responsible bodies in the countries for the development of these national plans, taking into account that they will probably be cross-sectoral in nature. In addition, the development of these national plans is related to ensuring continuous funding (in-depth research, writing the plan itself) and availability of qualified experts - it is necessary to discuss these issues, in particular for developing countries, taking into account Kazakhstan's position on Part III.1 (funding).

Kazakhstan asks for clarification, this information will affect Kazakhstan's final position on this provision.
