

## **CG1 Proposed Definitions**

**“Plastics”** mean materials made wholly or in part of synthetic and semi-synthetic polymers, including additives, non-intentionally added substances and other chemicals, that are used to create plastic products in any form and includes all thermoplastics, thermosets, elastomers, and composites made from both bio-based and fossil-based feedstocks.

**“Life cycle”** means the consecutive and interlinked stages of a product system, from raw material acquisition or generation from natural resources to final disposal.
