

On behalf of the Kyrgyz delegation:

Having reviewed Article 11 "Financial Resources and Financing Mechanisms"

We propose to supplement paragraph 2 with the words "Parties with economies in transition and landlocked countries" with the opening of square brackets

In paragraph 4 and paragraph 6, after the words "Parties that are developing countries", supplement with the words "Countries with economies in transition" with the opening of square brackets;

In paragraph 6 and paragraph 11, remove the words "in particular LDCs and SIDS" (since all developing countries and countries with economies in transition and landlocked countries" have an equal right to receive all available types of support. The selection and special designation of countries infringes on the rights of other developing countries. And the words "in particular" only mean LDCs and SIDS. In addition, the criteria by which the status of countries "most in need" is determined are not defined
