The United Nation Environment Programme,  
Gigiri, Nairobi,  
Kenya,**

8<sup>th</sup> August, 2025

**SEFAAI's written statement to the INC-5.2.**

We at Sustainable Environment Food and Agriculture Initiative, Nigeria a nongovernmental organization that promotes sustainable use of natural resources wish to pledge our unwavering support for the INC on plastics treaty process.

We seek to remind delegates and country representatives to deliver a treaty that is all inclusive and encompassing. We ask delegate to be mindful of the frontliners in the plastics pollution challenge; especially waste workers, indigenous people, coastal dwellers and the generality of humanity at large. As we seek for a global legally binding treaty, we urge member states to deliver a treaty that reflects just and equitable transition, a treaty that take care of lifecycle of legacy plastics from extraction to end of life. We are conversant with the health implication of plastics on animal, humans and our planet therefore we hope this week negotiation will deliver fast on a useable treaty as well as create a sustainable means of implementation with pathways for engaging critical stakeholder such as Academia, CSOs, local community and private sector.

Aderibigbe Abiodun

Director of Research and Business Development

Sustainable Environment Food and Agriculture Initiative, Lagos, Nigeria.

Thanks for your cooperation.

Yours faithfully,

Aderibigbe Abiodun

Director of Research and Business Development.
