Paragraph 4

we think under part 4A, 1 is fine with us, however, the options under a-d can be deleted as these impose additional burdens on developing countries.

Paras 2 and 3 are fine with us.

In para b., the heading should be progress assessment and the para 1 needs to be redrafted as its too dense with too many options and issues. OP1 and OP 2 alt is ok with us. We also think that the committee should be called progress assessment committee.

Our option is no text for review of chemicals of concern, micro plastics etc. We feel that this provision is linked to the obligations to be agreed by CG 1
