Member : Sri Lanka

Subject : Part II - 7 EPR

Sri Lanka endorses Option 1 and advocates for the incorporation of traceability and accountability measures within it. Moreover, we recognize the significance of implementing Extended Producer Responsibility (EPR) schemes, particularly by multinational companies distributing plastic products in developing nations through their agents or local dealers, as a means to mitigate plastic pollution. We emphasize the importance of integrating EPR as a tool within appropriate section such as waste management, to streamline efforts and prevent overlapping.
