

Sri Lanka supports Article 14: National Plans

National Plans, and stress the importance of country-driven plans that align with national development priorities and incorporate stakeholder inputs. Such plans are essential for effective and context-specific implementation of the Convention. Developing countries need financial assistance and technical assistance to achieve the objectives.

Sri Lanka has already developed a National Action Plan for Plastic Management (2021–2030), which reflects our national priorities and serves as a guiding framework for addressing plastic pollution through a comprehensive and strategic approach.
