

Tunisia statement on Article 11 : FINANCIAL [RESOURCES AND] MECHANISM

Tunisia support the intervention made by Senegal on behalf of AG to consider our CRP supported by 151 countries in the previous INC in busan as a basis of negociation of financial mechanism.

Tunisia emphasizes the need for a Multilateral Fund, which should be the main international mechanism for providing the necessary technical and financial resources. This Fund must be predictable, sustainable, and provide adequate technical and easily accessible financial resources to developing countries that must meet their commitments under the future instrument according the principle of common but differencied responsibilities and respective capabilities. The future instrument should facilitate information exchange, capacity building, international cooperation, and coordinate the best available scientific knowledge on sustainable consumption and production and research on affordable technologies.
