

TÜRKİYE- ARTICLE 15 REPORTING

We are in favor of universal reporting requirements for each party. But we believe that developing countries should be provided flexibility and support for their reports.

Also we can support inclusion the alt bis to the text since Türkiye has been stating that guidelines and modalities should be developed to ensure the reports are transparent and measurable.

Türkiye also would like to add the following sentence at the end of paragraph 2:

“each party shall report any new measure to be introduced, within 90 days prior to its implementation to the conference of parties without prejudice to reporting and/or notification requirements stemming from existing international agreements.”
