

United States proposal – Preamble

We generally support the Preamble section of the Chair’s text, with the following edits:

- Para 2: Delete
- Para 3: Insert “certain” as follows:
“Recognizing also the important role played by **certain** plastic in human society,”
- Proposal for new para 4bis:
Recognizing the importance of science-based decision-making and the contributions of scientific, economic, social, and technical information to the implementation of measures to reduce plastic pollution
