Brazil requests that its position on Article 10 (a) be registered:

“Brazil thanks for the proposal for Article 10 (a) as we believe that trade is a very important subject. At this point, Brazil reserves its position on Article 10 (a) as it is still being reviewed internally, with a view to the presentation of proposals that contribute to its implementation in accordance with the objectives of the instrument. There are also terms in said article which were not yet defined by INC and which prevents the presentation of those proposals at this point.”
