BRAZIL’S SUBMISSION

Contact Group I
Part II
Article 6 (Non-plastic substitutes)
Page 13

Brazil supports the text proposed in the Zero Draft, with the additions in paragraph 1 transcribed below, indicated in capital letters. Brazil clarifies that the cooperation mechanism mentioned in the proposal is part of a proposal that is being presented in Contact Group II.

The proposal also includes the need of conducting life cycle assessments so that there is no risk of utilization of regrettable substitutes.

“Each Party shall take measures to foster innovation, INCLUDING THROUGH THE COOPERATION MECHANISM REFERRED TO IN [part III, number of Article yet to be determined*], and incentivize and promote the development and use at scale of safe, environmentally sound, and sustainable non-plastic substitutes, including products, technologies and services, taking into account their potential for environmental, economic, social and human health impacts, BASED ON LIFE CYCLE ASSESSMENTS”.
