Cameroon Delegation position: Contact group II on Capacity-building, technical assistance, and technology transfer

The Cameroon delegation aligns itself with the proposal made by the Ethiopian delegation on behalf of the African group on Capacity-building, technical assistance, and technology transfer.

This capacity building and technology development will permit the sound implementation of this instrument.

My delegation which that this should be easily accessible, sound, and sustainable, impacting the development of less developed states.

We will also support intersessional work on this issue.
