
Costa Rica considers that the proposal on National Action Plans in the Zero Draft, is very well structured. Our delegation kindly requests that in point 1.1, in the Spanish translation, under 1.g, we read “responsabilidad ampliada del productor” instead of “responsabilidad extendida del productor”, as it appears in the English version, With regards to point 1.j, we suggest that it reads in spanish “materiales y artes de pesca” instead of “materiales de pesca”. In addition, in terms of substance, we believe that the National Action Plans are the basis for achieving the objectives through concrete actions to end plastic pollution, including in the marine environment. In Costa Rica, the national actions plans for the implementation of other Multilateral Environmental Agreements, have proven to be a key tool to measure, monitor and verify the implementation of the targets set.
