Intervention by the Delegation of the Republic of Costa Rica on CW 2, 
Wednesday 15th November 2023, morning session.

Thank you, co-facilitator,

Costa Rica’s delegation supports the interventions made by COL, MEX, ELS, JAM, 
CHI ARG, BRA AND URU. With regards to parra 1, CRI suggests the inclusion of 
circular economy since “Capacity Building” under a circular economy approach 
guaranties a social, economic and environmental inclusion, so that we may have a 
positive impact while achieving growth, taking into consideration all stakeholders, 
allowing us to leave no one behind, and improving awareness and knowledge, building 
policy framework and developing standardized indicators.

We would also like to support JAM’s intervention in maintaining technology transfer 
as a separate means of implementation from CB and TA, due to its to components and 
scope.

Thank you madam chair.
