Contact Group 3 – Intersessional Work

Proposal from Cuba

The intersessional work is needed in order to advance, but it cannot substitute the negotiation process that has to take place in INC-4.

The inputs of the intersessional work can be used as a reference of information for the negotiation process, but never will be a mandatory document, only as a reference.

In relation with the items, Cuba propose to work on the financial mechanism in order to identify the different options of multilateral funds, modalities for using finance and sources. For this issue we prefer an opened-ended working group that can work on line and at the end to have a meeting back to back with INC-4.

Cuba is flexible with the possibility to work in defining criteria to determine chemical and polymers of concerns, as well as definition of problematic and avoidable plastics products. For this issue we prefer an expert working group.
