13. Transparency, tracking, monitoring and labelling

1. Each Party shall:
   a. require producers and importers to disclose globally harmonized information on the chemical composition of all plastics and plastic products throughout their life cycle, and make such information available on a publicly accessible data base;
   b. take appropriate measures to ensure the traceability of chemicals, polymers and the plastic contents of feedstocks and products throughout the life cycle of plastics and plastic products, based on globally harmonized guidelines to be adopted by the governing body* at its first session, and in accordance with measures that may be specified in an annex to the instrument, for the purpose of protecting public health and the environment throughout the plastics life cycle; and
   c. establish marking and labelling requirements based on guidance to be adopted by the governing body* at its first session, and in accordance with measures that may be specified in an annex to the instrument, for the purpose of protecting human health and the environment throughout the plastics life cycle.

2. Each Party shall monitor and track the types and quantities of its production, imports and exports of chemicals and polymers used in the production of plastic polymers, plastics and plastic products, and regulated plastic products across their life cycle.

3. Each Party shall report the information collected pursuant to paragraph 2, together with information on the recycling facilities functioning within its territory, in a standardized format to the governing body*.

4. Each Party shall develop and promote the databases needed to administer and implement the requirements of this Article, and cooperate in the development and maintenance of any global database that may be established by the governing body.

5. The governing body* shall conduct, commencing [X] years after entry into force and at least every [X] years thereafter, a review of the guidelines and any annexes developed under this Article with a view to assessing the need for revised guidelines, or new or additional annex measures, to protect public health and the environment, or to otherwise improve the effectiveness of this instrument.

---

1 This provision complements, and contains requirements additional to, specific requirements relating to transparency, tracking, monitoring and labelling contained in other provisions of this instrument*.
