Thank you madam co-facilitator.

India believes that inter-sessional work should be transparent, participative and inclusive.

There have been several topics that have been highlighted by many countries for the inter – sessional work and India agrees to many of them. However, India does not agree with some of the topics about which it will be discussed as we move forward.

India would like to have inter sessional work on very important topic i.e. to map current funding and finance available to address plastic pollution and determine the need for financial support for financial support for each Member.

Thank You.
