Extended Producer Responsibility

Mauritius aligns itself to the position of Africa Group and that of AOSIS, that is we favour option 1.

Madam Co-facilitator

We firmly believe that the treaty should emphasize the importance of the polluter’s pays principle. In that, an EPR mechanism perfectly fits this scenario. An EPR mechanism will ensure that private sectors are accountable, fully taken on board and support the financing mechanism associated to ensure a safe circularity.

As SIDS, contribute minimally to global plastic production, we advocate that the mandatory EPR mechanism takes into account the national circumstances and capabilities of the parties with special flexibilities to SIDS.

Thank you Madam co-facilitator
