Contact Group 1:

Proposal by the Kingdom of Morocco on objectives

Morocco would like to align itself with the AG position as expressed by my colleague from Gabon and echoed by Uganda on a preference of option 1 with addition of sub-option 1.2 on the lifecycle approach. Morocco suggests that the text reads:

"The objective of this instrument is to end plastic pollution, including in the marine environment, based on a comprehensive approach that addresses the full life cycle of plastic, and to protect human health and the environment."

We see that the direct objective of the treaty should be to end plastic pollution which then will lead to protecting human health and the environment as an ultimate objective.
