New Zealand text proposal: Part II.13 Transparency, tracking, monitoring and labelling, paragraph 2

Text proposal

2. Each Party shall monitor and track the types and volumes of its production, imports and exports of chemicals and polymers used in the production of plastic polymers, plastics and plastic products, and regulated plastic products across their life cycle as well as any subsidies and fiscal incentives related to these activities.

Rationale

New Zealand supports increased transparency of the types and volumes of the production of plastics. We propose enhancing transparency by requiring Parties to monitor and track any related government incentives and subsidies programmes in relation to the production, imports and exports of primary plastic polymers.
