Uganda Statement on Primary Plastic Polymers

Uganda would like align herself to the statement read by the Distinguished Delegate of Gabon on behalf of Africa Region in regard to item 1.

Uganda would like to reiterate that the scope of the Instrument should stay within the limits of Resolution 5/14 and that is prevention of plastic pollution to protect human health and environment. Accordingly Uganda would support further improvement of Option 2 to restrict the option to **Primary Plastic Polymers of concern to human health and environment**.

The definition of Primary Plastic Polymers will have to be agreed for purposes of the future Instrument and the National Circumstances should be taken into account.
