Written Submission

Country: Uganda
Organization: Youth Alive Uganda
Agenda item: 4

Youth Alive Uganda wishes to make the following submission during the INC-2 Nairobi

1. More restrictions should be put on more industrialized countries to stop turning Africa into a dumping space for plastics and more punitive measures be put in place.
2. African countries should be supported economically by development partners and private sector to develop their own industries that are environmentally friendly and use plastic alternative.
3. Member states should invest in green jobs and youth innovations that provide alternative to plastic and recycle plastics.
4. Member states need to invest more resources in awareness creation especially in rural areas showing how plastic pollution affect their livelihoods.
5. There should be an international legal body for the enforcement of the INC instrument to allow implementation of the instrument by all member states and once approved all member states should domesticate the instrument and not be left at the mercy of member states to decide whether to implement it or not.
